

1 Full process

$$p + p \rightarrow u + \bar{u} \rightarrow \tilde{u}_1 + u + \tilde{e}_{12}^+ + e^-$$

#evt/bin

Data within bounds:

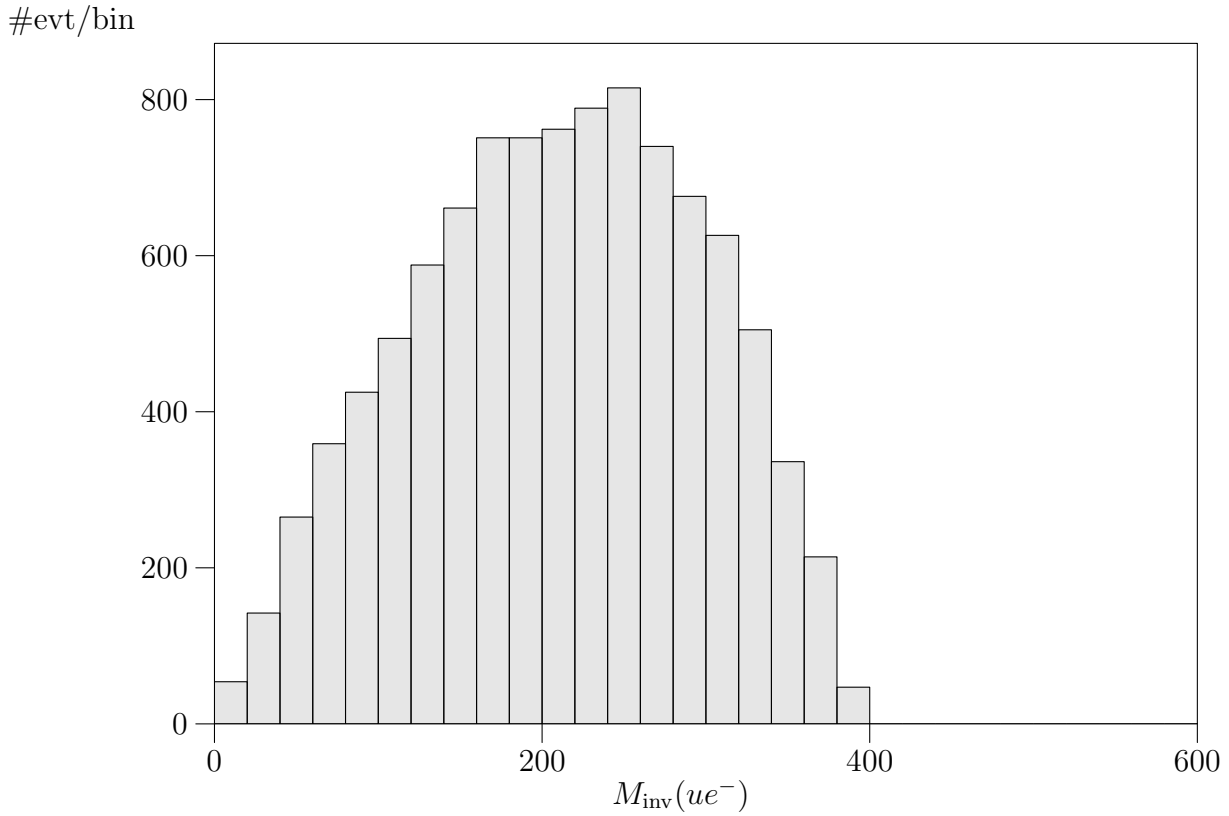

$$\langle \mathcal{O} \rangle = 216.7 \pm 1.04 \quad [n_{\text{entries}} = 9776]$$

All data:

$$\langle \mathcal{O} \rangle = 231.0 \pm 1.44 \quad [n_{\text{entries}} = 10000]$$

2 Factorized process with complete spin correlations

$$p + p \rightarrow u\bar{u} \rightarrow \tilde{u}_1 + (\tilde{u}_1 \rightarrow u + (\tilde{\chi}_2^0 \rightarrow \tilde{e}_{12}^+ + e^-))$$

Data within bounds:

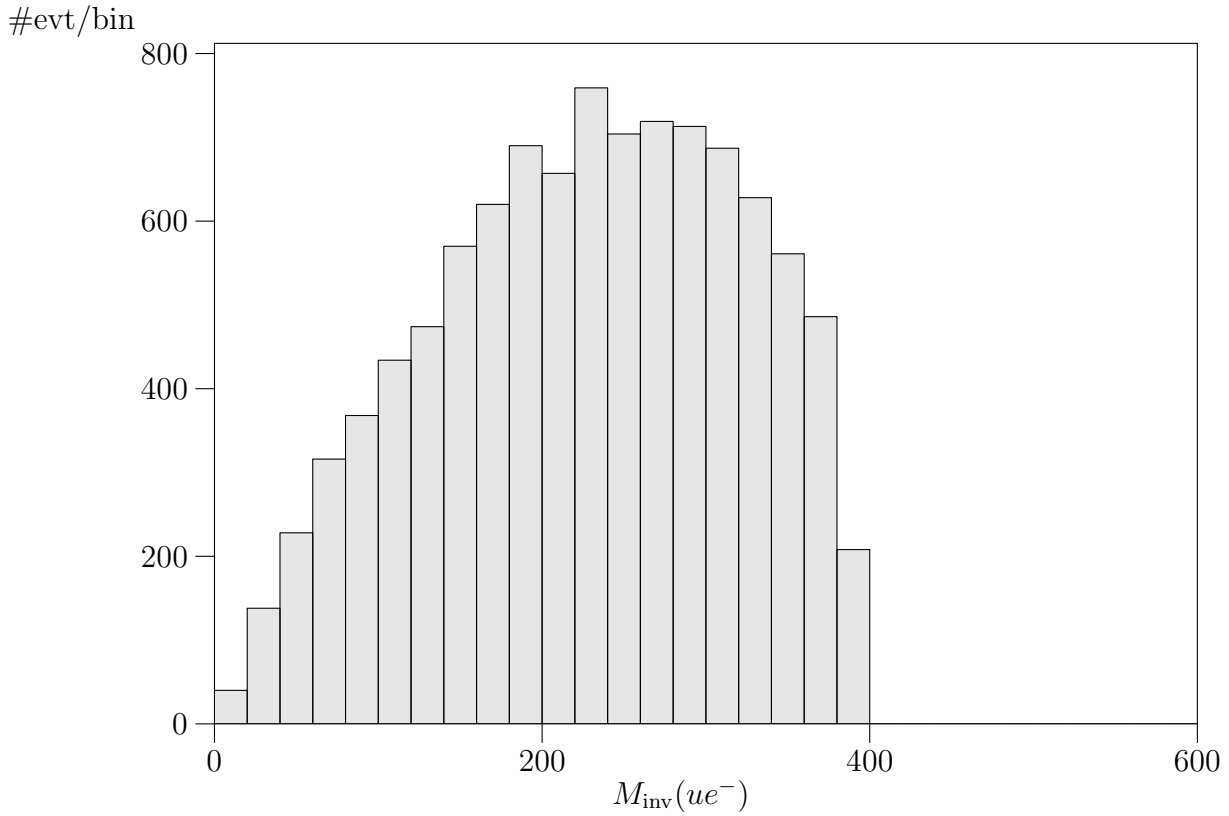

$$\langle \mathcal{O} \rangle = 209.9 \pm 0.86 \quad [n_{\text{entries}} = 10000]$$

All data:

$$\langle \mathcal{O} \rangle = 209.9 \pm 0.86 \quad [n_{\text{entries}} = 10000]$$

3 Factorized process with classical spin correlations

$$p + p \rightarrow u\bar{u} \rightarrow \tilde{u}_1 + (\tilde{u}_1 \rightarrow u + (\tilde{\chi}_2^0 \rightarrow \tilde{e}_{12}^+ + e^-))$$

Data within bounds:

$$\langle \mathcal{O} \rangle = 226.8 \pm 0.92 \quad [n_{\text{entries}} = 10000]$$

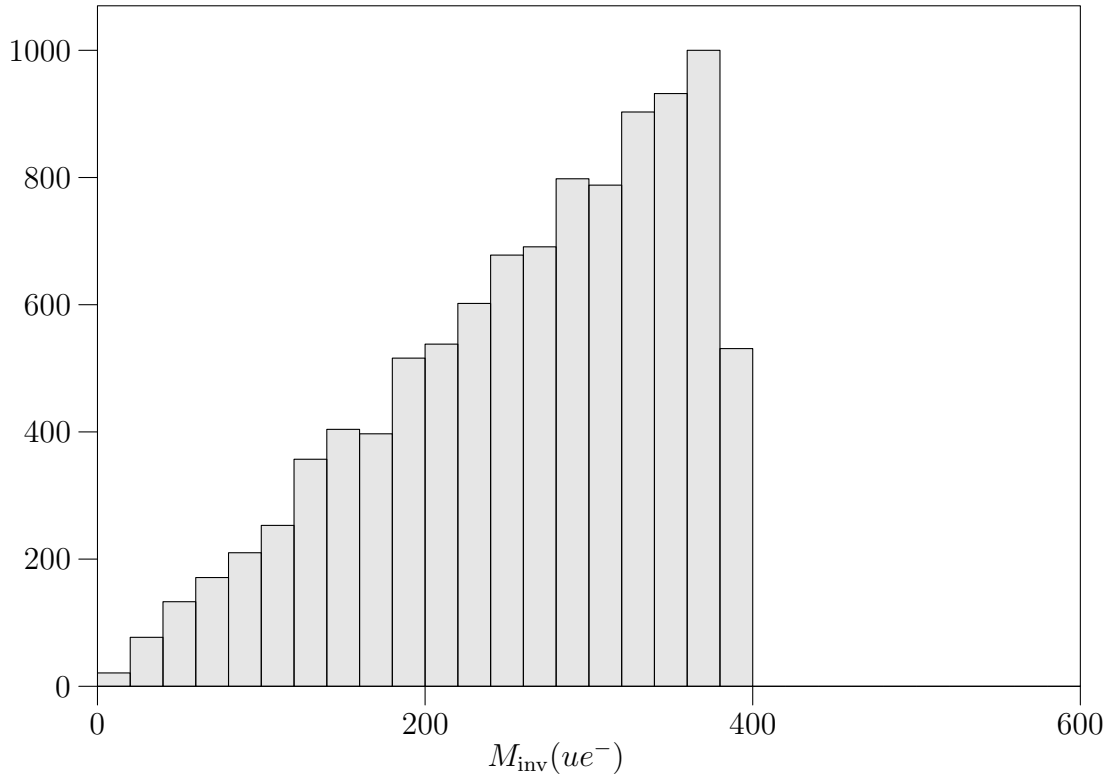

All data:

$$\langle \mathcal{O} \rangle = 226.8 \pm 0.92 \quad [n_{\text{entries}} = 10000]$$

4 Factorized process with isotropic decay

$$p + p \rightarrow u\bar{u} \rightarrow \tilde{u}_1 + (\tilde{u}_1 \rightarrow u + (\tilde{\chi}_2^0 \rightarrow \tilde{e}_{12}^+ + e^-))$$

#evt/bin

Data within bounds:

$$\langle \mathcal{O} \rangle = 262.4 \pm 0.91 \quad [n_{\text{entries}} = 10000]$$

All data:

$$\langle \mathcal{O} \rangle = 262.4 \pm 0.91 \quad [n_{\text{entries}} = 10000]$$
